

Problem 1 (35 points)

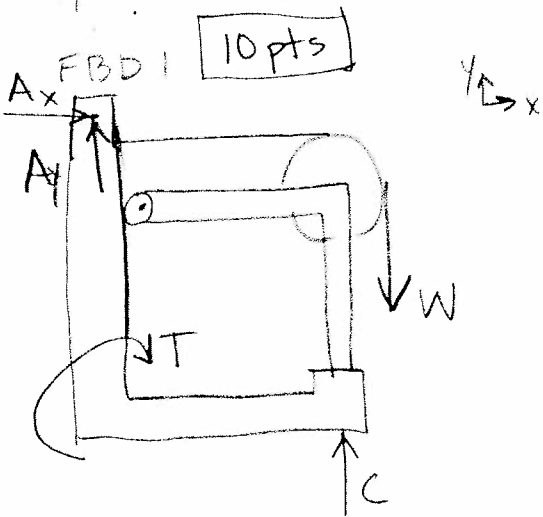

The two-member frame below supports a 200 lb load (weight) and a 500 ft-lb couple as shown. All components are weightless except for the 200 lb weight. **Set up the following problem, but do not solve. Clearly number your equations and list your unknowns.** We wish to determine

- (a) the force that the roller at C exerts on ACD and
- (b) the force that the roller at B exerts on ACD.

label equ's: 2 pt
label/list unknowns: 1

Option 1:

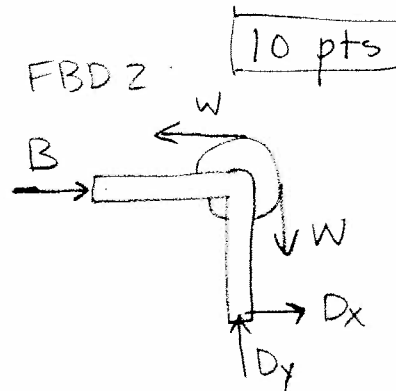

$$\sum M_A = 0$$

$$0 = -T - W(5) + C(4)$$

$$C = \frac{T + 5W}{4} \quad (1)$$

unknown: C (Ax + Ay)

$$\sum M_D = 0$$

$$0 = -B(3) + W(4) - W(1)$$

$$B = W \quad (2)$$

unknown: B (Dx + Dy)

CM Box _____

Option 2: 9 pts

$$\sum M_A = 0$$

$$0 = -T - W(5) + C(4) \quad (1)$$

$$C = \frac{T + 5W}{4} \quad (1)$$

$$\sum F_x = 0 \rightarrow A_x = 0 \quad (2)$$

$$\sum F_y = 0 = A_y - W + C \quad (3)$$

$$A_y = W - C \quad (3)$$

unknown: C, Ax, Ay

Option 1 variation

5 pts

$$\sum M_D = 0$$

$$0 = -B(3) + W(4) - W(1) + E_x(3)$$

4 pts

5 pts

$$\sum F_x = 0 \quad E_x = 0$$
