Alma Mater

Music by Raymond Mech

Lyrics by Andrew Mech, PhD, Emeritus Professor of Mechanical Engineering

Here in central Indiana
is the school we know is best.
Rose-Hulman, Yes, our Alma Mater
far surpasses all the rest.
Sing her glories and her praises
in every way she does excel.
Rose-Hulman, you're our Alma Mater
our Alma Mater loved so well.

Rose did more than set foundations
for the work that was to come.
The people here became as family;
Rose became another home.
Though we live at quite a distance
and time has passed since our farewell,
Rose-Hulman you have grown yet dearer
our Alma Mater loved so well.

Dear Old Rose The School Fight Song

Words and Music by Malcolm C. Scott, Class of 1922

Dear Old Rose
The sweetest flower that grows
Here's to your colors rose and white
Here's to the ones who've kept them bright.
Colors true for those who honor you
Here's to everything you've done,
Here's to every fight you've won.
Dear Old Rose.

COMMENCEMENT SPEAKER & HONORARY DEGREE RECIPIENT

Jeffrey A. Ready

Chief Executive Officer and Co-Founder
Scale Computing

Alumnus Jeffrey A. Ready has taken his computer science skills and entrepreneurial ambitions into becoming one of the nation's top 25 Information Technology (IT) innovators while developing Scale Computing into a market leader in edge computing, virtualization, and hyperconverged solutions.

The 1996 computer science graduate co-founded Scale Computing in 2007 and as Chief Executive Officer has led the Indianapolis-based company through multiple rounds of funding, explosive growth, and many industry changes. Scale Computing experienced record growth for 2024, with cutting-edge technology that's bringing innovative solutions and enhancing data processing capabilities to thousands of customers worldwide.

In both 2024 and 2025, Computer Reseller News (CRN), a brand of The Channel Company, ranked Ready atop a distinguished list of the nation's top 25 Information Technology (IT) innovators, alongside forward-thinking leaders from Dell, Microsoft, Hewlett Packard, and Intel. He has been consistently cited among the Top 25 Disruptors in IT by the publication.

CRN also cited Indianapolis-based Scale Computing among the top edge computing companies that is providing diverse solutions, from infrastructure deployment to Artificial Intelligence and edge management.

Prior to Scale Computing, Ready was co-founder and chief executive officer with California-based Corvigo, a Linux-based anti-spam appliance, where he oversaw the company from startup through funding to acquisition. After the acquisition, Ready was vice president of marketing at Tumbleweed Communications. Prior to Corvigo, he was co-founder, chief operations officer, and vice president of marketing with Radiate and a software engineer, director of marketing, and co-founder with Terre Haute-based THIS Internet.

Ready's passion for entrepreneurship and startups and technology has him being a regular public speaker on entrepreneurship and related topics. He is a member of Rose-Hulman's Sawmill Society and an advisor of several startups, including Indianapolis' Centerpoint Brewing Company and Florida-based Kalogon, a medical equipment manufacturer involving several Rose-Hulman alumni. Ready also has been an active board member of the National Federation of Independent Business and chair of the GEO Foundation, a non-profit organization creating innovative schools across the country.

"I love innovation, and I love both creating and helping others create the products and companies that solve real problems for real people. That passion was developed and encouraged throughout my education at Rose-Hulman and has continued through relationships with my former professors and fellow alumni," states Ready, who has returned to campus to be a guest speaker for engineering management courses and student startup activities. "I thrive on hearing that a customer loves what I've helped to build. I believe this kind of direct innovation and problem solving – whether it's leveraging technology, creating a new kind of high school, defending entrepreneurship, or launching a beer brand – is good for the world. I am passionate about both doing it myself and helping others learn to do the same."

Ready has also provided valuable insight as a STEM professional and Rose-Hulman alum in establishing the groundwork involving entrepreneurship within the Institute's Advancing by Design long-term strategic plan.

THE ACADEMIC PROCESSION

In today's academic procession, the gown and hood indicate the degree held by the wearer. The hood is lined with the official color or colors of the college or university conferring the degree. Graduates of certain institutions wear gowns in the color of the university, faced down the front with velvet panels and with velvet crossbars on each sleeve. The velvet may be black or may be the color representing the field in which the degree was conferred.

ROSE-HULMAN BACHELOR'S DEGREE ATTIRE

Rose-Hulman Institute of Technology bachelor's degree holders or candidates wear a black gown and a black mortarboard with a red and white tassel. Students graduating cum laude, magna cum laude, or summa cum laude wear gold honor cords.

ROSE-HULMAN MASTER'S DEGREE ATTIRE

Master's degree hoods for Rose-Hulman Institute of Technology are black, lined with rose red satin and white satin chevrons, and edged in orange velvet. With the gown and hood, a black mortarboard and red and white tassel are worn.

CURRENT AND PAST TRUSTEES CHAIR

Black gown with red chevrons bordered in gold piping, and red front panels.

TRUSTEES

Black gown with black chevrons bordered with gold piping.

PRESIDENT

Red gown with black chevron bordered with gold piping. The front panels on the gown include the official school seal. The colors inside the hoods for the trustees and president represent the official school colors of old rose red and white.

ETA KAPPA NU

Scarlet and navy cords signify membership in Eta Kappa Nu, the national electrical and computer engineering honor fraternity.

PI MU EPSILON

Violet, lavender, and gold cords signify membership in Pi Mu Epsilon, the national mathematics honor society.

UPSILON PI EPSILON

Maroon and white cords signify membership in Upsilon Pi Epsilon, the international honor society for the computing and information disciplines.

PRESIDENTIAL MEDALLION

The gold-plated Rose-Hulman Presidential Medallion carries the school seal on one side. The other side portrays a rendering of the Flame of the Millennium sculpture bordered by the phrase "Continuing Our Legacy of Excellence."

SCHOLARSHIP HONORS

Students graduating with a scholarship index of 3.90 or higher will be graduated summa cum laude; those with a scholarship index between 3.60 and 3.90 will be graduated magna cum laude; and those with a scholarship index between 3.30 and 3.60 will be graduated cum laude. These honors are recognized by the display of gold honor cords at the commencement ceremonies and in appropriate fashion on the diplomas.

THE HEMINWAY GOLD MEDAL

This award, established by the late Mrs. Sarah A. Heminway, is awarded to the graduating undergraduate student with the highest grade-point average. In the event of a tie, duplicate awards are given.

THE JOHN T. ROYSE AWARD

The John Tuller Royse Award was inaugurated at Rose-Hulman to honor Mr. Royse in perpetuity for his many years of service to the college as a member of our board. The Royse tradition on the board continues today with John N. Royse an emeritus member.

The award consists of a bronze medal and cash honorarium to be made at commencement each year to the graduating senior who, in the opinion of the faculty and administrative staff, is considered to be our most outstanding graduate based on academic achievement, student leadership, participation in co-curricular activities, and general campus citizenship. The recipient must be nominated by a classmate, a member of the faculty, or administrative staff.

THE MOENCH COMMENDATION

Herman A. Moench graduated from our school in 1929. He served as associate vice president and professor of electrical engineering for more than five decades. Moench helped shape the Rose-Hulman values that we all cherish today, including putting the student first, remaining humble while striving for excellence, and encouraging close student-teacher relationships.

In 1980, the first Moench Commendation was awarded. This is a person who is "not just a good student in the upper half of their class, but also has demonstrated exemplary character in the eyes of their peers and teachers; a person who has been influential in making Rose-Hulman a better place." The recipient is selected by a vote of faculty and administrative staff.

A BRIEF HISTORY OF ROSE-HULMAN

As it celebrates its 150-year sesquicentennial in 2024, Rose-Hulman proudly looks back on its history and ahead to its future. Rose Polytechnic Institute welcomed an inaugural class of just 25 students in 1883 inside a towering, gothic structure at 13th and Locust streets in Terre Haute. The school was the brainchild of entrepreneur and philanthropist Chauncey Rose, who dreamed of creating an institute of higher learning “for the intellectual and practical education of young men.”

The institute’s heritage of educational excellence dates back to its earliest days, when the Board of Managers and a few other prominent community leaders, coaxed Charles O. Thompson, then-president of the prestigious Worcester Free Institute of Industrial Science, to take the leadership post at Rose. Under his guidance, the academic bar was set very high and has remained that way ever since.

The camaraderie and campus traditions that have long defined the student experience at Rose also started in its earliest days. By 1920, Rose freshmen were wearing “R” beanies to denote their newbie status and Rosie the elephant was established as the school’s mascot. Those and other traditions would survive a move to the country in 1922 when the campus transferred to its current location, where even more traditions were born, such as the annual Homecoming bonfire and voluntary (and sometimes involuntary) dips in Speed Lake.

Student enrollment began to accelerate on the new campus and would top 1,000 in 1969 under the leadership of then-President John Logan. The face of the campus also began to rapidly change, especially in the last quarter of the 20th century, when Cook Stadium, Hadley Hall, Oakley Observatory, Myers Center for Technical Research with Industry, Olin Advanced Learning Center and Olin Hall were all constructed. The institute took another major step in 1995 when the first female students were admitted under the leadership of President Sam Hulbert. Its physical infrastructure continues to grow and improve today under the leadership of President Robert A. Coons, with the recent addition of a state-of-the-art new academic building, the Kremer Innovation Center, the Pi-Vilion and the fully renovated Mussallem Union.

With growing student diversity and the addition of 1,100 acres of property south of campus that will soon house the new Innovation Grove district, the institute continues to build on the strong foundation laid by its visionary leaders, dedicated educators and hard-working students. With 26-consecutive years of No. 1 rankings from U.S. News & World Report and other recognitions, the institute, now with an enrollment of approximately 2,300 undergraduates and graduate students, remains firmly established among the leading engineering, math, and science colleges anywhere in the world.
