

## Honesty Pledge – Test 2

Read the following carefully. Turn it in when you complete this test.

1. I understand that the Instructor expects me to be honest on this test.
2. I understand “being honest” includes:
  - a. ***While I am taking this test, I will not communicate in any way with anyone other than the Instructor or his assistants.***
    - I will not talk with anyone else or exchange information with them during the test.
    - ***I will not use email, chat or the like during the test.***
  - b. ***After*** taking this test, if I want to communicate with anyone about this test, I will make sure that she has already taken the test. If she has not, I will not communicate with her in any way about the test. No hints, no suggested problems to study, nothing!
  - c. For the ***paper-and-pencil*** part, the only external resource allowed is the 1-page (front and back) “cheat sheet” that I brought to the test.
  - d. For the ***on-the-computer*** part:
    - I may use any written materials that I have brought to the test.
    - I may use anything that I stored on my computer before the test, or that I create during the test.
    - I will *not* use the internet beyond what is allowed – items reachable directly from the CSSE 120 web site, and my SVN repositories.
    - ***I will not use any search engine (like Google).***
3. I understand that if I am NOT honest on this test (i.e., if I violate the above rules), ***that is grounds for me to receive an F in the course, along with possible expulsion from Rose-Hulman.***
4. I understand that if I do NOT do as well on this test as I would like, ***I can discuss with my instructor how best to deal with that.*** In particular, I understand that ***trend counts, and doing well on Test 3 and the final exam can mitigate a low score on this test.***

5. ***Check one of the following:***

***I agree to the above.***

***I do NOT agree to the above and will talk with you [your instructor] privately soon after the test.***

***Turn this in when you complete the test.***
