

For Test 1, the picture should be like that shown immediately below. For this test:

- The window size is **350 x 200**
- The given starting point is at **(30, 30)**
- The number of lines to draw is **6**.

The **returned value** should be **36**.

For Test 4, the picture should be like that shown above. For this test:

- The window size is **450 x 300**
- The given starting point is at **(30, 30)**
- The number of lines to draw is **20**.

The **returned value** should be **218**. Note that the thicknesses max out at 13.

Tests 2 and 3 are two tests on one **550 x 200** window.

Test 2:

- The given starting point is at **(80, 10)**
- The number of lines to draw is **9**.
- The **returned value** should be **75**.

Test 3:

- The given starting point is at **(30, 50)**
- The number of lines to draw is **3**.
- The **returned value** should be **9**.
